Amazon Amazon Channel Authorization Teaching Instructions

The authorization of the Amazon channel API connection must be set by the manufacturer in the background of the seller's account according to the following steps. After the setting, the authorization key for the API connection of the IDS North American cloud warehouse to be issued by Amazon can be obtained. Cloud warehouse can be docked and executed.

Once the order information meets the principle of delivery after the docking is enabled, the manufacturer can quickly complete the delivery through the IDS cloud warehouse after confirming the invoices one by one, effectively improving the delivery time and saving the round-trip time between the seller and the warehouse.

Fulfillment Management

we offer two fulfillment services to support you in meeting with the delivery specification of main online channels.

One-click generation

IDS North America Cloud Warehouse specifies the delivery company within the United States. We will intelligently match the most suitable storage area outbound assignment according to your delivery instructions, and use the Ground delivery service to help you complete the delivery of the goods. If your goods exceed the scope of Ground transportation, we will use pallet shipping to execute your shipping instructions. If your product size exceeds the standard pallet or weighs more than 300 pounds, please contact the special person, we will discuss with you

or

Self-delivery

The channel / platform provider or your buyer designates the delivery company in the United States. IDS North America Cloud Warehouse performs the goods picking and outbound tally operations in accordance with your delivery instructions, and contacts your designated delivery company to pick up the product. In addition to providing basic pick-up services in online sales channels (such as wayfair), we can also provide bulk out-of-stock or on-demand shopping services according to your business needs.

One-Click Delivery service

Besides amazon order API, you can input the fulfillment request individually or bulk import by excel file. We fulfill the order base on same-district priority and FIFO policy.
